Donald Yusuf

Profile

I am a front-end developer with experience building modern, responsive, and user-friendly web applications. I work with React.js, Next.js, and TypeScript, and I use Tailwind CSS, Framer Motion, and UI libraries like NextUI and shadcn/ui to create clean, interactive designs.

I have hands-on experience with state management (Zustand, Redux), Firebase for authentication and storage, and tools like Cloudinary and Sanity for handling media and content.

I enjoy turning ideas into functional, visually appealing interfaces and constantly learning new technologies to improve my efficiency.

Work Experience

Intern

- 🏢 Nhub Nigeria
- 📅 Nov 2023 - Feb 2024

I started my journey at nHub Nigeria as a student, where I gained hands-on training and mentorship in software development. Over time, I transitioned into a working role, contributing to real projects and collaborating with teams to build practical solutions. My time at nHub helped me strengthen my skills in front-end development, problem-solving, and teamwork, while also giving me exposure to Nigeria's growing tech ecosystem.

Education

Information technology

- 🏢 Bingham University
- 📅 2024 - 2028

I am currently studying **Information Technology at Bingham University**, where I have been building a strong foundation in technology and problem-solving. My journey so far has allowed me to combine theory with practical skills, especially in front-end development, and it has shaped my interest in creating modern digital solutions.
